Teknion's consultants and developers possess technical expertise and deliver clear-thinking solutions. We are on the leading edge of technology innovation, familiar with all the emerging technologies and development techniques.

Put Teknion passion to work for you!

Teknion's Business Consulting service is backed by over two decades of industry experience and success, harnessing IT initiatives that drive business operations success for maximum results. Teknion business consultants can help you view, track and manage all your data for competitive advantage.

In today's rapidly changing business world, organizations can benefit from Teknion's business consulting services. Teknion has a strong track record of facilitating improvement in enterprise-wide information management, enhanced decision-making and increased performance management for a wide variety of clients in multiple industries.

Teknion offers a full spectrum of business technology consulting services designed to help our clients evaluate their current IT landscape, their data strategies and opportunities for better informed and more timely decision-making. Our consulting service offering is designed to result in enhanced financial management, regulatory compliance, as well as improved marketing and customer service initiatives.

IT strategy

Teknion consultants work with our clients to set a course that ensures that their IT strategies support their business strategies. By working closely with client teams and IT experts, Teknion consultants can help your organization realize value from existing IT systems, while determining how IT organizations can help you harness full business potential from your IT infrastructure.

Technology assessments

Teknion's solution provider team works hand-in-hand with your IT organization to provide a comprehensive review of your systems as a foundational step toward operational improvement. Based on our review, our consultants will provide key strategies and roadmaps to improve organizational efficiency

and effectiveness as well as to optimize the protection of your valuable information resources.

Project management

Using advanced project management methodology and project portfolio management, Teknion will assist you with expert project management of IT project initiatives. Our methodology is founded on proven PMO best practices.

Training and mentoring

Teknion provides extensive training on DataStage, SharePoint, data integration and other topics. Our goal is to help clients realize improved ROI by empowering them to maximize their information data effectiveness through integrated IT systems.

Healthcare consulting

Teknion can assist you with business intelligence (BI), system integration, or applications development. Our approach aligns people, process and technology to maximize overall operational performance. We empower our clients to have visibility into their data in order to mine its full potential for better and more informed decision-making.

Marketing innovation and strategies

Teknion's marketing solutions include a variety of approaches designed to improve demand generation, drive revenue opportunities, expand market share and improve business results.

About Teknion

Teknion empowers its clients to achieve breakthrough performance by delivering software and business intelligence solutions that its clients use to boost operational efficiencies, increase collaboration, and bring new insights into data. An unwavering commitment to clear thinking on behalf of its clients sets Teknion apart and has resulted in long-lasting, loyal and trusted relationships with an impressive list of satisfied clients. At Teknion, we set ambitious objectives for client engagements, and we make a habit of meeting or exceeding them with unparalleled speed and quality.
