- Track and evaluate business and IT processes and resources to set goals for continuous improvement
- Achieve faster ROI through best practices and standardized methodologies and architectures
- Shift to an analytical and performance-based culture

Teknion Advantage

Teknion provides Business Intelligence (BI) services that can be effectively used to mitigate risk, measure corporate performance and develop predictive business models. Our value is our ability to integrate BI analytics with existing applications and processes, address ease-of-use and compatibility issues. We are a trusted advisor, strategic business partner, and expert BI implementer.

Information management is the key to making the right business decisions at the right time. Teknion brings together a portfolio of BI and data management/integration services, software, and expertise to deliver uniquely efficient solutions across an organization's functional areas and initiatives.

Time to market, single views of customer data, and adherence to regulatory pressures are some of the key success determinants for companies today. Unfortunately the information needed for strategic decision-making is often stored in multiple applications, databases, spreadsheets and disjointed platforms abounding with data quality issues. Together this makes it difficult or impossible to create accurate timely reports and perform deeper business analysis.

The ability to collect and analyze internal and external data differentiates our clients from their competitors. Teknion offers a comprehensive set of Business Intelligence services to help clients harness structured data to improve decision-making, financial management, regulatory compliance and customer service.

Teknion's Business Intelligence professionals utilize available and state-of-the art data resources to help organizations improve strategic decision-making and support financial reporting.

Competencies

To ensure that the right people have the right information at hand to make BI generate value enterprise-wide, we use:

- Microsoft PerformancePoint Server
- Microsoft SQL Server Reporting Services (SSIS)
- Microsoft Office SharePoint Server
- Microsoft Excel Services
- IBM Cognos
- Tableau software

Our experienced BI professionals develop solutions that enable business users to make better and faster decisions by equipping them with affordable, secure and easy-to-use dashboards, metrics and other analytic tools.

Teknion Solutions

At Teknion we work collaboratively with our clients to evaluate processes, collect business logic data and identify workflow bottlenecks in order to unleash hidden data from heterogeneous and legacy systems. We then work with clients to optimize and automate processes, rendering systems—and businesses—more agile.

Our dashboards, metrics and analytics make it easier than ever for business users to access their data gain insights into their day-to-day activities. Our data solutions arm you to make decisions confidently and quickly.

Service Offering
