Offerings

Our offerings include a full range of technology services that meet the unique business needs of our clients.

Business intelligence – our BI solutions enable organizations by enhancing company-wide information management, improving overall decision-making and increasing performance management. By making data available in real time, we help clients store, view, manage and govern all types of data in all its forms and formats, providing better service and increased insight to employees and customers. Our BI solutions help clients increase transparency, reduce costs, improve productivity, and achieve a faster ROI.

Software solutions – we utilize the latest methodologies and technology to design and build custom solutions, as well as implement and integrate commercial software applications, helping clients optimize operations and reduce costs. Our solutions include: application development/NPD, database management, system integration, system testing, and application conversions and upgrades.

Business consulting – we advise clients on IT strategy, technology assessments, and provide project management, training and mentoring, marketing strategies and healthcare consulting to help clients improve organizational efficiency and achieve key business objectives
