

Software Solutions

Key Benefits

- Optimized business performance
- Reduced costs
- World-class application development
- Extensive multi-industry experience
- Leading-edge technology innovation

Teknion Advantage

Whether your objective is to resolve an existing issue currently limiting business performance or to develop a new capability that will allow you to tap into new markets, Teknion can help. Our expert consultants have extensive experience customizing software solutions that answer a wide variety of business needs, including:

- Business planning and analysis
- Productivity enhancements
- Scalable customized applications
- Portal solutions that drive down costs

Teknion's consultants and developers possess technical expertise and deliver clear-thinking solutions. We are on the leading edge of technology innovation, familiar with all the emerging technologies and development techniques.

Put Teknion passion to work for you!

With Teknion's comprehensive software solutions, clients can innovate, measure, analyze and optimize business performance across entire enterprises. We integrate the finest technologies from leading software vendors and those of our alliance partners to deliver world-class software solutions that maximize your organization's decision-making, enhance performance and reduce costs.

Through Teknion advanced software solutions, we are committed to enhancing your organization's decision-making, regulatory compliance, financial management, marketing strategy and customer service capabilities.

Our comprehensive suite of business technology services offers software solutions that address extensive range of business needs. We are *passionate* about helping our clients leverage technology for competitive advantage in their markets.

Application development

Teknion consultants are experts in .Net, C#, HTML, Flash, Java, SQL, SharePoint and many other application development technologies. We leverage all the common backend database technologies including IBM, Oracle, Microsoft and Teradata databases.

We work collaboratively with our clients to ensure that the application answers a specific business need, generates appropriate value and follows effective project management methodologies.

System integration

At Teknion, system integration begins with listening to our clients. Once we thoroughly understand their business objectives, infrastructure and integration needs, Teknion consultants design, build and deploy the appropriate customized integrated systems solution. Our solutions leverage ETL tools such as SSIS and DataStage as well as traditional application development tools such

as .Net C#, Java and SQL. Additionally, we leverage our extensive portfolio of partner offerings in order to determine the technology initiatives that best meet our clients' business needs

System testing

As the infrastructure environments necessary to support IT technologies increase in complexity, testing is essential to avoid deployment errors that could have negative impacts. Teknion tailors its testing approach appropriate to the scope and risk of the project and utilizes the right mix of manual, automated and regression testing strategies.

Application conversions and upgrades

Converting or upgrading system technologies can pose a considerable challenge to business operations. If not handled properly, that challenge can turn into a serious risk to ongoing business operations. Teknion leverages its experience working in numerous platforms and toolsets to guide its clients through the complex process of conversions and upgrades

We are experts at properly mapping data between disparate sources, utilizing diverse ETL tools and development technologies. Whether your initiative calls for planning and coordinating an upgrade strategy or implementing an established conversion path, Teknion consultants can be your partner ensuring seamless conversions and upgrades.

About Teknion

Teknion empowers its clients to achieve breakthrough performance by delivering software and business intelligence solutions that its clients use to boost operational efficiencies, increase collaboration, and bring new insights into data. An unwavering commitment to clear thinking on behalf of its clients sets Teknion apart and has resulted in long-lasting, loyal and trusted relationships with an impressive list of satisfied clients. At Teknion, we set ambitious objectives for client engagements, and we make a habit of meeting or exceeding them with unparalleled speed and quality.
